

SOUTH POINT SCHOOL

An ISO 45001:2018 Certified Institution

NOTICE

Sub: Publication of the School Magazine

Dear Students and Guardians,

Publication of the School Magazine is an integral part of any school's annual calendar and an important tool of communication between its various stakeholders. At South Point, it serves as a medium through which information of various happenings related to the institution is communicated to students and parents. It provides a platform to showcase the budding literary and artistic talents of our students. It allows our educators the opportunity to connect with and motivate young minds. It also brings the present students closer to their predecessors, who have graduated from this school and contribute their thoughts for the benefit of the youngsters.

We have been publishing our school magazine uninterrupted for the last many years. And we could not have allowed the pandemic to discontinue this tradition this year. We are happy to announce the publication of the South Point magazine – POINTER – exclusively on the digital platform this year. You can access the magazine from the link provided below, and read it on a variety of digital media, including phones, tablets and computers. A digital copy of the magazine can also be downloaded by you and stored in your devices. You can share the entire link or any specific page, with your family and friends and even on social media. The magazine has also been uploaded on the School's website. Do share with us your feedback on this new mode of publication of POINTER.

The link for accessing the publication is given below:
